The 14" RULE

—a measure of safety
for your **CHILD'S EYES**

IMPROPER lighting frequently causes a child to bring her book much closer to her eyes than the normal reading distance—which is 14 inches.

If this is allowed to continue it may lead to defective vision, and so we suggest that you observe the kind of light your child is reading under. Only the very best is good enough because, remember, about $\frac{3}{4}$ of all the knowledge she will acquire through life will come through her eyes.

You can help your child make progress in her studies and reduce the possibility of future eye trouble by paying attention to proper home lighting **NOW**. We will be only too glad to consult with you.

BUILD YOUR BUSINESS

WITH
GOOD
Printing

YOUR letterhead is often your first contact with customers, with your bank, with manufacturers from whom you want credit. Does this "first impression" do justice to your business? Expensive letterheads aren't necessary. We'll design and print one that's handsome, modern—and charge you only for the actual work.
